

date September 2023

Overview of ingredients in the GFLI database (version 2.1)

The database version 2.1, publish date October 2023, includes more than 1800 datasets. In this overview you'll find the available datasets as indicated in the GFLI database, with the source, year of publication, and the total data quality rating of that dataset. The source indicates the type of project what kind of data as collected, see table 1.

Table 1. Information about the sources indicated in the GFLI database

Source	Information about the project	Reference year
AFP 6.3	Datasets created through the GFLI default method of statistical and open source data, by Blonk Consultants.	2022
AFP additional	Datasets created through the GFLI default method of statistical and open source data that are currently not available in AFP, by Blonk Consultants.	2022
AFP – Nevedi	Datasets created conform the GFLI default method of statistical and open source data, by Blonk Consultants, funded by the Dutch Feed Association Nevedi.	2022
EAPA	Datasets created through industry data sourced from the European Animal Protein Association (EAPA) members.	2018
EFPRA	Datasets created through industry data sourced from the European Fat Processors and Renderers Association (EFPRA) members	2021
GFLI BFAN	Datasets created through industry data sourced from the German Federal Association for By-Products as Animal Feed (BFaN) members	2019
GFLI Brazil	Datasets created through higher tier modelling sourced from the Brazilian Agricultural Research Corporation (Embrapa).	2021
GFLI Canada	Created through industry data on cultivated ingredients and complemented by statistics from Statistics Canada for missing data, by ANAC	2019
GFLI group totals	Datasets created through averaging available data for the European region, sourced from the PEF screening study for feed (2018)	2018
UKFFPA	Datasets created through industry data sourced from the Former Foodstuffs Association of the United Kingdom (UKFFPA) members.	2019
USDA	Created through statistical data from the USDA.	2017
VIDO	Datasets created through industry data sourced from the Dutch Former Foodstuffs Association (VIDO) members.	2019

More information about the formatting of the life cycle impact assessment (LCIA) format of the database can be found in the LCIA guidance document on the webpage <https://globalfeedlca.org/gfli-database/database-formats/>
